**What is fecal coliform and E. coli?**

Fecal coliform and E. coli are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Microbes in these waters can cause short-term effects, such as diarrhea, cramps, nausea, headaches or other symptoms. They may pose a special health risk for infants, young children, some of the elderly, and people with severely comprised immune systems.

**How long will this warning be in effect?**

We will consult with the Washington State Department of Health about this incident. We will notify you when you no longer need to boil the water.
